PROFESSIONAL SUMMARY

Full-Stack Developer specializing in React.js, Node.js, MongoDB, and Socket.IO, with experience building AI-powered applications and real-time systems.

TECHNICAL SKILLS

Languages: JavaScript (ES6+)

Frontend: React.js, Next.js, Tailwind CSS, Redux

Backend & Databases: Node.js, Express.js, Socket.IO, MongoDB, Redis, BullMQ

Developer Tools & AI: Git, GitHub, Linux, Gemini API, Local LLMs

ENGINEERING PROJECTS

AstrixChat | Real-Time Communication Platform

React.js, Node.js, Express.js, MongoDB, Socket.IO

- Engineered a real-time messaging platform using Node.js and Socket.IO, enabling bidirectional communication, live user presence, and scalable WebSocket-based messaging.
- Benchmarked and optimized API performance using Autocannon to sustain 2,250+ requests per second (RPS) for message storage, maintaining <25ms average latency under high-concurrency load tests.
- Built a context-aware translation system that incorporates the previous 10–20 messages to preserve conversational tone, intent, and grammatical accuracy across multilingual chats.

Kaevrix | AI-Powered Personalized Learning Platform

Next.js, Node.js, Socket.IO, Gemini API, YouTube IFrame API

- Built an AI-powered personalized learning platform that transforms YouTube tutorials into structured roadmaps, study material, and quizzes using the YouTube IFrame API and Gemini AI, making self-paced learning more structured and interactive.
- Moved AI roadmap generation to a BullMQ background queue, preventing long-running LLM requests from blocking user-facing API endpoints and improving application responsiveness.
- Prevented concurrent profile update conflicts using MongoDB's atomic update operations, ensuring consistent XP and skill progression.
- Reduced AI API overhead by generating study notes and quizzes from a single structured Gemini response instead of separate requests, simplifying backend processing and reducing redundant API calls.

Education

Bachelor of Computer Applications (BCA)

Aryavart International University

Expected Graduation: 2026

- Relevant Coursework:** Operating Systems, Computer Networks, Data Structures & Algorithms, Database Management Systems (DBMS), Linux Administration.
- Performance:** CGPA 8.21/10 (Current)
